

NAVEEN S

Full-Stack & DevOps Engineer

Tumakuru, Karnataka, India | +91 6360760312 | naveen.siddappa44@gmail.com
linkedin.com/in/naveen-s-44ns | github.com/Naveen4421

PROFESSIONAL SUMMARY

Full-stack developer with a foundation in C and Linux alongside modern web and DevOps tooling. Passionate about automation and data analytics, with hands-on experience building CI/CD pipelines, containerized deployments, and debugging distributed systems — seeking to apply this automation and problem-solving mindset to roles that value strong analytical and debugging skills.

TECHNICAL SKILLS

Languages: C, Python, HTML, CSS, JavaScript/TypeScript
Frameworks: React, Next.js, Node.js
DevOps & Cloud: Docker, Kubernetes, Jenkins, AWS, Linux
Tools: Git, GitHub, VS Code, Power BI, Jira

PROJECTS

CI/CD Pipeline for Full-Stack App

Docker, Jenkins, Kubernetes

Implemented an automated DevOps pipeline from code integration to secure Kubernetes deployment, including automated testing, security scanning, and Prometheus monitoring — with an emphasis on build reliability and root-cause debugging when pipeline stages failed.

DSA Tracker

Next.js, Tailwind, GitHub Actions

Designed and built a progressive web application for tracking coding challenges, integrated with automated unit tests and continuous deployment serverlessly on Vercel.

Flight Price Predictor

Python, ML, Flask

Developed a machine learning regression model to predict flight ticket prices based on historical flight features, exposed via a production-grade Flask API.

EDUCATION

Bachelor of Engineering (B.E.), Artificial Intelligence & Data Science

Expected 2027

Shridevi Institute of Engineering and Technology, Tumkur

CGPA: 8.5

ADDITIONAL INFORMATION

- Languages: English, Kannada, Hindi
- Certifications: Programming Fundamentals in Python (Infosys Springboard)
- Internship: Web Development (2 months) at Outrix
- Soft Skills: Quick Learner, Analytical & Debugging Mindset, Time Management, Team Player
