PROFESSIONAL SUMMARY

Passionate about automation and data analytics, seeking a DevOps Engineer role to apply my knowledge of cloud computing, CI/CD pipelines, containerization, and automation tools to drive efficient software delivery and continuous improvement.

TECHNICAL SKILLS

Programming Languages: Python, C , HTML, CSS

Tools: Power BI, VS Code, GitHub , Docker ,Jenkins ,Kubernetes

Interests: Software Development, DevOps, Full Stack

Soft Skills: quick learner , Time management , Team player

PROJECTS

Drug Detection Using ML

Developed a model to classify and detect drug types based on chemical properties and patterns using supervised learning algorithms. Implemented data preprocessing and feature extraction for accurate predictions. Achieved improved detection accuracy through model tuning and evaluation.

CI/CD Pipeline for a Full-Stack Web Application Using Docker, Jenkins, and Kubernetes

- This project focuses on implementing a complete DevOps pipeline for a full-stack web application, automating the process from code integration to deployment and monitoring. The goal was to ensure faster, more reliable, and scalable software delivery with real-time system visibility and alerts.

EDUCATION

- Bachelor of Engineering (B.E.) in Artificial Intelligence & Data Science
- Shridevi Institute of Engineering and Technology, Tumkur (Visvesvaraya Technological University)
- Year of Completion: 2027 | CGPA: 8.5

ADDITIONAL INFORMATION

- **Languages Known:** English, Kannada, Hindi.
- **Certifications:** Programming Fundamentals in Python (Infosys Springboard), Internship Completion (Web Development duration : 2months in Outrix)
